

Woodland Creation Project

PROJECT ONE | Woodland Creation Project

The project aims to restore 1.5 hectares of broadleaved woodland at Low Barns Nature Reserve. It is intended to plant approximately 1,500 trees of native species origin into an area previously covered with dense conifer plantation.

Location:	Low Barns Nature Reserve
Period:	January, February, March
No. days available	3

Inventory:

Provision of 500 trees, deer guards, tree ties and tree stakes
